

EXTEND *Plus* DEVELOPER

Low Contrast Film and Print Developer

EXTEND *Plus* DEVELOPER is a *designer* developer specially formulated to exhibit low contrast characteristics in both film and paper.

EXTEND *Plus* DEVELOPER provides more latitude for managing high contrast film exposures by developing film and/or paper to a range of lower contrasts. Combinations of time, temperature, and dilution ratios are used to obtain the desired results.

EXTEND *Plus* DEVELOPER provides an alternative for salvaging high contrast negatives normally producing unusable prints.

- ✓ Recommended starting dilution for film is 1 part concentrate to 15 parts water. Develop a test exposure for 6 to 8 minutes at 75° F (23.8° C).
- ✓ Recommended starting dilution for prints is 1 part concentrate to 7 parts water. Develop a test exposure for 1 to 1 ½ minutes at 75° F (23.8° C).
