

## **P20 PRINT DEVELOPER**

### *Neutral Tone*

**P20 PRINT DEVELOPER** is a clean working, phenidone based print developer producing pure blacks, clean whites, and detailed middle tones

**P20 PRINT DEVELOPER** produces neutral tones continuously from highlights to shadows and maintains a smooth continuous curve of normal contrast.

**P20 PRINT DEVELOPER** is non-staining and does not contain metal, an irritant.

**P20 PRINT DEVELOPER** is highly concentrated with a recommended starting dilution of 1 part concentrate to 7 parts water.

Contrast control may be facilitated by mixing **P20 PRINT DEVELOPER** in a more dilute form and increasing development time.

**P20 PRINT DEVELOPER** is suitable for automatic machine processing, replenished with working solution at 0.15 ml/sq.in. paper.
